

## **"One-start One-stop" Service Centre**

Thai government plans to establish a "One-start One-stop" Service Centre under Prime Minister Office to be the only one channel that foreign investors need to contact. It is the government's effort to eliminate the red tape and to facilitate foreign investors contact with all relevant government agencies in order to create a conducive atmosphere for business activities.

The "One-start One-stop" Service Centre will cover visa, work permits, investment laws and trade agreements. This "One-start One-stop" Service Centre is expected to start the operation in October at Government House.
